

About the job

Do you enjoy working with a challenging range of moulds in the food industry? Do you take pride in shaping an essential pillar of our future? Then this position as **Moulding & Tooling Technician** at CURA Packaging is tailor-made for you!

About Us

CURA Packaging BV, located in Kampen, is a plastic processing company specializing in the development, injection moulding, assembly, and packaging of products related to food administration. Currently, approximately 50 employees work at CURA Packaging, many of whom work in shifts. Production takes place under GMP/cleanroom conditions. The company is certified for ISO 13485 and BRC Packaging & Standard and has a clear vision regarding quality and hygiene.

Our technical department is closely involved with the production floor and plays a vital role in supporting our employees and ensuring the optimal operation of our moulds and machinery. To realize our growth ambitions and further expand our innovative position in the market, we are seeking a:

Moulding & Tooling Technician (m/f)

The Role

As a Moulding & Tooling Technician, you will perform preventive and corrective maintenance on moulds in compliance with required specifications and safety regulations.

You will work closely with the Process Engineer, Planner, and Technical Manager to prioritize tasks. Additionally, you will use your technical insight and experience to create a preventive maintenance schedule and implement it in coordination with production planning. Your primary focus will be on maintaining moulds in optimal condition, detecting and addressing potential defects, and preparing moulds for installation in machines according to the applicable quality and safety standards.

Your Ideal Background

- Preference goes to a completed MBO-4 level education in mechanical/precision engineering or a related field.
- 2–5 years of relevant experience is preferable.
- Knowledge of moulds and their functionality.
- Insight and experience in setting up and performing preventive maintenance is preferable.
- Affinity for technology, preferably injection moulding.
- Hands-on mentality.
- Proficient in Dutch (English is a plus).

Your Competencies

- Technical skills
- Results-oriented
- Ability to work according to strict planning
- Strong communication skills
- Flexible
- Problem-solving abilities
- Accuracy/ Attention to detail

What We Offer

- A competitive salary based on your work experience.
- A challenging work environment with opportunities for personal development.
- No rigid frameworks: plenty of room for initiative and input.
- Great colleagues and a positive work atmosphere.
- At least 26 vacation days (depending on age).
- Pension Plan.
- A plant and attendance bonus at the end of the fiscal year.
